ALEEM ALAM

Senior Full-Stack Engineer | Next.js · TypeScript · AI Agents · Web3

Delhi, India • +91 85879 33195 • aleem.alam2001@gmail.com • aleemalam.com • github.com/AleemAlam

SUMMARY

Senior full-stack engineer with 5+ years shipping production web applications. Lead engineer on Polkasafe, a multisig platform securing over $300 million in assets, and senior engineer on Polkassembly. Recently building AI agent systems end to end: tool-calling agents, LLM evaluation, cost control and media-generation pipelines. MSc in Applied Data Analytics & AI.

WORK EXPERIENCE

Polka Labs — Dubai (Remote) Mar 2023 – Present

Web3 products across the Polkadot and EVM ecosystems — polkassembly.io, polkasafe.xyz, Townhall, blobscriptions.xyz.

Lead Engineer — Polkasafe Mar 2023 – Present

- Lead the frontend architecture of a multisig asset management platform securing $300M+ across Polkadot and EVM chains (treasurease.xyz for EVM).
- Built wallet connection, transaction construction and multi-party signing flows in Next.js and TypeScript.
- Built real-time dashboards for balances, pending approvals and transaction history, in sync with on-chain state.
- Integrated safe-global and polkadot.js, with Firebase for off-chain data and authentication.

Senior Engineer — Polkassembly Mar 2023 – Present

- Built governance features for the Polkadot, Kusama and Substrate governance forum: proposal discovery, voting interfaces and identity-linked user flows.
- Rendered on-chain governance data in real time using Subsquid indexing, polkadot.js and Firebase.

Frontend Engineer — Bayzat, Dubai (Remote) Aug 2022 – Jan 2023

HRMS, payroll software and insurance provider.

- Built and maintained product features on bayzat.com in React and modern frontend tooling.

React Engineer — RocketLane, Chennai Apr 2022 – Aug 2022

Purpose-built platform for customer onboarding and implementation.

- Built and maintained product features on rocketlane.com in React.

Instructional Associate — Masai, Bangalore (Remote) Jan 2021 – Apr 2022

- Answered students' full-stack questions and authored DSA problems for Masai's online judge.
- Built and maintained internal applications, including web apps and Slack apps.

PROJECTS

Elvz AI — multi-agent social media assistant (personal project) 2026

Next.js · TypeScript · Vertex AI (Gemini) · Firebase · AWS

- Built an AI agent that learns a brand's voice from its website and social accounts, then plans, writes, schedules and publishes posts through the official Meta, LinkedIn, TikTok and YouTube APIs.
- Designed an intent router and tool-calling agents, with durable background jobs (retries, checkpoints) for long-running tasks.
- Built an LLM-as-judge eval harness that lifted chat quality from 3.6 to 4.55 / 5; benchmarked a lightweight classifier that matched Gemini's routing accuracy (86% vs 87%) at 3–8x the speed and 1/60th the cost.
- Added AI image and video generation pipelines (async jobs, webhooks, Cloud Storage) and a Telegram bot that handles voice notes.

TECH SKILLS

AI: Vertex AI (Gemini), LLM agents and tool calling, LLM evaluation (LLM-as-judge), AI image and video generation
Frontend: Next.js, React, TypeScript, JavaScript, Redux, HTML, CSS
Backend & Cloud: Node.js, Express, Firebase / Firestore, Google Cloud, AWS, MongoDB, Subsquid
Web3: Wagmi, WalletConnect, MetaMask, polkadot.js, safe-global
Testing: Vitest, Cypress, Playwright

EDUCATION

MSc Computer Engineering (Applied Data Analytics & AI) — Vistula University Feb 2024 – Aug 2025

Full Stack Web Development — Masai, Bangalore, India Aug 2020 – Dec 2020

Bachelor of Computer Applications — Lingaya's University, Faridabad, India Mar 2016 – Aug 2019
